Sujal Ghimire

Graphic Designer & MERN Stack Developer

As an aspiring professional with expertise in both Graphic Design and MERN stack development, I bring a strong foundation in Adobe Photoshop, Illustrator, InDesign, and full-stack technologies like MongoDB, Express.js, React.js, and Node.js. I am passionate about creating innovative solutions and delivering quality results. With a keen eye for detail and excellent communication skills, I am eager to contribute my creativity and technical abilities to a forward-thinking team, while continuously growing in a professional environment.

TRAINING/CERTIFICATIONS

Graphic Design

Broadway Infosys / 2023

I successfully completed a Graphic Design training program at Broadway Infosys, spanning 3 months. The course focused on mastering industry-standard tools such as Adobe Photoshop, Illustrator, and InDesign. Under the guidance of professional designer Ramu Aryal, I gained extensive experience in creating a wide range of design materials including brochures, banners, posters, logos, book designs, templates, and business cards. This training enhanced my skills in visual communication, branding, and layout design.

MERN STACK

Broadway Infosys / 2024

I completed a comprehensive MERN Stack training program at Broadway Infosys over a period of 3 months. The course covered key technologies including MongoDB, Express.js, Node.js, React.js, HTML, and CSS. Under the mentorship of professional developer Raktim Shrestha, I gained hands-on experience in full-stack web development, building dynamic websites, working with APIs, and applying best practices in both front-end and back-end development. This training enhanced my skills in creating efficient, responsive, and scalable web applications.

PROJECTS

Graphic Design Portfolio

During my graphic design training, I completed a wide range of design projects including business cards, posters, advertisements, brochures, book designs, logo designs, banners, menus, flyers, and certificates. Each design was created under the supervision of a professional mentor, who provided feedback and approval on my work. These projects helped me refine my skills in layout design, branding, and visual communication, ensuring that my designs were both creative and aligned with professional standards.

Private Food Blog Webpage

I developed a private food blog webpage as part of my MERN Stack training, designed to share and explore various culinary experiences. The project was built using MongoDB, Express.js, React.js, and Node.js, and features a user-friendly interface for posting, editing, and managing blog content. The design and development were carried out under the guidance of a professional, focusing on responsive design, seamless API integration, and a smooth user experience. This project helped strengthen my skills in full-stack development and web design.
